Abstract (en)
[origin: EP0124807A1] 1. Transportable, rectangular cabin for accommodating apparatus and operating personnel, having a metal frame and walls in the form of sandwich panels reinforced by stringers, the stringers on the internal surfaces extending vertically and breaking into the internal wall surfaces, characterised in that the external surfaces have stringers extending perpendicularly to those on the internal surfaces, that the stringers on the internal surfaces are composed of two parts in the form of extruded sections (72, 74) which can be fitted together to form a positive snap locking connection and that the extruded sections (72, 74) have projections (80, 84, 86) by which double grooves of the internal wall panels (76, 78) of the sandwich panels can be clamped together.
