Abstract (en)
[origin: ES8502383A1] A print head for direct or indirect electrostatic printing comprises at least one row (21) of electrodes disposed at a regular pitch and organized in n groups (G1 . . . Gn) per row, together with a counter-electrode (1) constituted of a resistive material extending opposite the electrodes in the row with n+1 conductive tracks defining n resistances in series (R1 to Rn) and constituting access connections (C1, Cn+1) thereto for selecting different groups of electrodes.
