Abstract (en)

The invention pertains to low-sudsing liquid detergent composition comprising a micellar structured liquid and a suds-suppressant, characterized in that the suds-suppressant comprises an intimate mixture of an oily substance and a nitrogen compound of the general formula: <CHEM> where R<1> and R<3> represent aliphatic hydrocarbon residues containing 14-22 carbon atoms, R<2> and R<4> represent hydrogen atoms or aliphatic hydrocarbon residues containing 1-22 carbon atoms, and R represents an aliphatic residue containing 1-9 carbon atoms. The invention provides low-sudsing liquid compositions which do not suffer from deactivation of the suds-suppressant.
