Abstract (en)
[origin: EP0126540A1] A cutting device (1) for cutting a vegetable and the like including a cup-shaped lower housing (2), an inverted cup-shaped upper housing (6) with a connecting apparatus for connecting these housings, a cutter disk (8) arranged in the lower housing (2), and a fixing apparatus (3) attached to the lower housing (2). These housings, the disk, and the fixing apparatus can be disassembled from one another. The upper housing (6) can be detached from the lower housing (2) by releasing the connecting apparatus (7). The manually operated cutter disk (8) can be lifted and removed from the lower housing (2). The lower housing (2) also can be disassembled from the fixing apparatus (3), which has a sucker member (4) operated by a lever (5).
