Abstract (en)

[origin: EP0126670A1] 1. An information panel, in particular for public transport stops, for example on bus routes, of the type formed by a vertical elongated flat stand fixed by a support to the ground and intended for displaying various items of information such as the name of the stop and/or the name of a town, directions and notice of other stops served by one or more transport routes or similar, characterised in that it comprises, on the one hand, display elements (9) in the form of detachable modular elements (10 to 15) detachably secured to its upper end and identifying by means of suitable marking said items of information relative to the places and routes served and, on the other hand, a display window (3) disposed in a central part of said panel, which is recessed with respect to its front face, and serving to display the general conditions of use of the means of transport.
