Abstract (en)

For reduction in labour conventionally needed for separate panty and toe closing processes and transportation of middle products between the processes, a panty closer assembly (P) is directly joined to a toe closer assembly (T) via a transferer assembly (50) arranged at their junction so that panty-closed incomplete panty-hoses (5) are automatically transferred from the panty closer (P) to toe closer (T) assembly by assistance of the transferer assembly (50).
