Abstract (en)
[origin: EP0126911A2] 1. Striplike workpiece of hinges, in which two respective adjacent hinges are connected rigidly at the front ends, each of which comprises two hinge flanges (1, 2), which are pivotably connected together at their adjacent edges by a hinge roller (3, 4) and a hinge wire, and are provided with attachment spikes (11) for frictional insertion into parts to be pivotably connected to the hinge which are bent substantially at right angles along their free edges, characterized in that the hinges are connected by a spike bridge passing through the workpiece which comprises the attachment spikes (11) angled in the area of the hinge.
