Abstract (en)

[origin: EP0126955A1] 1. Open-air ground surveillance apparatus comprising a strip of ground (2) which is to be monitored and comprising poles (6, 7, 8) which are erected along the strip of ground (2) and serve to support illuminators (9 to 14) and television cameras (15, 16, 17) which are connected to an image analysing device, characterised in that the strip of ground (2) comprises at least three control strips (21 to 25), which are aligned parallel to one another and each of which has a different grey value, and that the illuminators (9 to 14) and television cameras (15, 16, 17) which are assigned to one and the same region of ground strip are supported several metres above the control strip.
