Abstract (en)

[origin: EP0126982A1] 1. A road marker in the form of an elongate, beam-like body with a substantially constant solid section along the length thereof, the marker having a lower, plane fixing surface (20), two lateral surfaces (22, 24), and an upper surface (26) made of a rubber material and having screw holes (36) allowing screw-fixing of the marker at intervals, the screw holes extending perpendicularly to the fixing surface (20) and having a widening for receiving the screw heads, and the marker having a reflecting area (34) on at least one lateral surface (22, 24), characterised in that the marker is made of an elastic, linear or granular recycled rubber and has an internal, plane reinforcement (44) located in the area of the screw holes (36) and closely connected to the rubber material.
