Abstract (en)  
[origin: EP0127186A2] A slide fastener stringer (1) having a continuous zigzag-shaped thermoplastic molded coupling element strip (3). The strip (3) includes a succession of spaced coupling elements (5), each having a pair of first and second legs (9, 10) extending from a head (8) in a common direction. A plurality of first and second solid connecting portions (6, 7) is disposed alternately at opposite sides of the strip (3) and extends one between each adjacent pair of the coupling elements (5). The individual connecting portions (6, 7) are more slender than the coupling element legs (9, 10). The two adjacent legs (9, 9), (10, 10) interconnected by each connecting portion (6), (7) terminate in a combined broad foot with opposite corners or ends (9b, 9b), (10b, 10b) thereof substantially squared and thus not chamfered.
