Abstract (en)

[origin: EP0127542A1] 1. A thermally insulating modular construction unit comprising a thick exterior insulating panel (1) of substantially parallelepipedic shape, and a rigid and thin interior panel (4) which are parallel to each other and connected by spacer members (2, 62, 82), characterised in that the exterior panel (1) is covered on its large side opposed to the spacer members with a definitive facing (10) of a water-proof material resisting shocks and ultra-violet rays and decorative, and the exterior insulating definitive facing panel assembly (1 and 10) has, at its periphery, means (3, 55, 56) for recovering and canalizing water whereby it can flow and be discharged to the exterior.
