Abstract (en)
[origin: EP0128225A1] 1. Wiping mop with a stick (1), to which is fixed a wiping element, and a pressing device (3) for the wiping element, characterized in that the pressing device (3), designed as an area pressing device, is arranged behind a wiping head (4) on the stick (1), and in that the wiping element, designed as a wiping cloth (5), is detachably fixed to a pulling device (6) which leads from both lateral ends (8) of the wiping head (4) into and through the pressing device (3) and consists of two flexible rods (9) running in each case substantially to the two lateral ends of the wiping head (4) via the stick (1) to a pulling handle (2) in guide tracks (7), which rods take the wiping cloth (5) from a widespread position, in which the wiping cloth (5) extends to the two ends of the wiping head (4) into the pressing device to a position suitable for pressing the wiping cloth (5).
