Abstract (en)

Process for establishing a sound-proofing wall (4) along a traffic road or the like according to which branches are planted close to one another in the soil and are made to grow, in such a way that they can grow into and against one another so as to form a closed wall. Panels (5) being positioned between two rows of branches to obtain an almost closed wall immediately after the planting of the branches, said branches previously being connected to one another by means of threads or ropes to form a sort of weave.
