Abstract (en)  
[origin: EP0128364A2] In a joint filling press for pasty one-component sealing matter having a housing (1) in which a sealing matter container (7) can be inserted for pressing out the sealing matter, a helical spring (13) which can be compressed at any time is mounted in the housing (1), by means of the spring force of which spring the sealing matter can be pressed continuously out of the container (7) after the spring support is released, both ends of the helical spring (13) being moveable independently of the position and arrangement of the opposite end of the spring by means of extension and control elements (10,10',12, 14-23). <IMAGE>
