Abstract (en)

[origin: EP0128420A2] 1. An item of jewellery consisting of segments of different alloy stages of a noble metal, wherein the individual segments are welded together, characterised in that it is produced from a blank (1) whose segments (3, 4) of different alloy stages have melting points which are close together, wherein the individual segments are fusion-welded together in such a way as to give a progressively changing colour characteristic.
