Abstract (en)

[origin: EP0128457A2] In a coding method for an electronic key, a number of code numbers 1 to n are stored in the transmitter (1) and in the receiver (2) and a new corresponding code number is set automatically in the transmitter (1) and receiver (2) after every transmission and reception operation. The code emitted by the transmitter (1) contains information for the receiver (2) as to which code number is to be selected next from the stock. <IMAGE>
