Abstract (en)  
1. Ventilating roof tile, especially a ridge-junction ventilating tile, in which a) a plurality of projections and/or webs (11, 20, 21, 22, 23, 24) is arranged in the head zone (7), and b) projections and/or webs adjacent to one another limit channels (12) for eliminating the circulating air conveyed outwards from the roof interior by means of the ridge tile, characterized in that c) the head zone (7) of the tile (1) is screened off by a continuous baffle and low-pressure ledge (9) separated from the webs and/or projections by means of a cross-channel (13) and extending transversely over the tile surface, and d) the height of the baffle ledge exceeds the height of the webs and/or projections (11, 20, 21, 22, 23, 24).

Abstract (de)  
Ein Firstanschluss-Entlüfterziegel weist auf seinem Kopffeld eine Vielzahl von Nocken und/oder Stegen auf. Einander benachbarte Nocken und/oder Stege begrenzen Kanäle, die für die Ableitung der durch den Firstziegel vom Innenraum des Daches nach aussen geleiteten Umluft dienen. Eine Stauleiste schirmt das Kopffeld des Ziegels ab und verhindert das Eindringen von Feuchtigkeit in die Kanäle. Derartige Stauleisten werden auch bei Gaupenlüfterziegeln und bei Lüfterfirstziegeln verwendet.
