Abstract (en)
[origin: EP0129635A2] The stencil frame (10) consists of profile tubes (11) which each have a wall (14) with a flat attachment surface (13), lying in the same plane for all the tubes (11), for a printing net (12). In order to design the stencil frame (10) in such a way that its cleaning is facilitated and the attachment of the printing net (12) to the stencil frame (10) is improved, the tube wall (19) on the inner side of the net is designed to descend from its starting point at the tube wall (14) having the attachment surface (13) towards the tube wall (17) located on the edge side of the net.
