Abstract (en)  
[origin: US4592295A] There is provided an automatic shirt cuff manufacturing unit comprising an overcast stitching machine, a buttonhole forming machine and a button sewing machine. The unit includes means for conveying the cuff to the overcast stitching machine, means for removing the cuff from the overcast stitching machine, means for positioning at least one of the ends of the cuff with respect to one of the working heads of the buttonhole forming and button sewing machines, the working heads of said machines being arranged opposite one another, means for orienting the cuff so that it assumes the proper orientation, or an orientation at 180 DEG from it, under the working heads, means for bringing the cuff under said heads while maintaining it in correct position, and means for removing the cuff from the machines.
