Abstract (en)
[origin: EP0130342A2] 1. Capacitive high frequency continuous oven for the drying of textile fabric, in particular knitted cotton, in which the fabric can be transported between the electrodes, characterised in that in the oven (1) there is arranged a mechanical device (8, 9) for vibrating the fabric (7) during the drying process, and in that the frequency and/or the amplitude of vibration can be varied.
