Abstract (en)  
[origin: EP0130567A2] 1. Covering for pools, more particularly swimming pools, consisting of hollow section elements, which at one end have overflow apertures and at the other end have ventilation apertures, whereby the ventilation apertures can be optionally connected to the ambiance or to a pressurized gas source and whereby the hollow section elements are guided on guiding devices vertically disposed on the pool, characterized in that the guiding devices comprise at least two rigid vertical guide rails (12, 12') securely connected to the pool and with mutual horizontal spacing, which are secured to the pool wall (11), which is adjacent to the end (5, 5') of hollow section elements (1, 2) comprising overflow apertures (6) and in which adapters (13) engage, which are connected to this end (5) and each of which comprises an articulation having a horizontal axis of articulation (17, 17').
