Abstract (en)
[origin: EP0130955A2] Press tool provided with two mutually opposing, registering and relatively movable column (2) mounted carriers (1, 3) for tool parts (6, 7) for working an elongate workpiece (21), a device (9, 11-19) mounted on the first (1) of the carriers for advancing the workpiece through the tool formed by the tool parts and means (22) mounted on the second carrier for actuating the advancing device. The advancing device includes a slide (9) displaceably mounted on the first carrier (1) and a gripping element (15) mounted on the slide, said element being actuatable by means (22) mounted on the second carrier (3) for clamping or releasing the workpiece (21) to, or from the slide, and also for displacing the slide a predetermined distance through the tool parts (6,7). Figure 1 is a suitable illustration.
