Abstract (en)
[origin: WO8402682A1] Methods and apparatus for molding foam materials in which smooth surface finishes and easy release of molded objects or articles (20) from the molds (10) in which they are formed are accomplished by the provision of fluorocarbon polymer mold liners (14) movable relative to supporting mold structures.

Abstract (fr)
Procédés et appareil de moulage de mousse expansée dans lesquels des finitions lisses des surfaces ainsi qu'un démoulage aisé des objets ou articles moulés des moules (10) sont obtenus à l'aide de chemises de moules en polymère de fluorocarbène (14) mobiles par rapport aux structures de moules de support.
