Abstract (en)

[origin: EP0131120A1] 1. Process for the very fine spraying of suspensions by means of a pressurised gas by an air atomiser nozzle and a device comprising a spray head with nozzle opening (3), a plunger (4) arranged in the interior of the spray head and slidable through the nozzle opening and a sieve member (6) arranged between the inlet (2) for the suspension and the nozzle opening (3), with wiping device (7) for the sieve member, characterised in that the pressurised gas is saturated or supersaturated with a liquid.
