Abstract (en)
[origin: EP0131129A2] 1. A modular terminal block comprising a plurality of modular terminal members which are arranged in juxtaposed relationship and which are interconnected for joint mounting on a mounting rail and which are provided on both sides, at their narrow sides, with mounting means for identification carriers, characterised by the use of at least one interconnected identification carrier strip (3) on each side of the modular terminal members as a provisional single connecting means for forming the block prior to joint mounting on the mounting rail.
