Abstract (en)

The concentrated detergent is contained into single-dose containers (8) in the form of pots sealed by an easily tearable sheet material (11). The fitted up vessel is provided at its neck portion with a piercing element (4) in the form of a pyramidal truss-like element. The user inserts the said single dose containers (8) on the said piercing element (4), thus tearing the thin closure sheet material. The concentrated detergent flows into the lower body portion (1) of the vessel wherein the diluting liquid (water) has already been introduced.
