Abstract (en)

[origin: US4610550A] A watch is described having a case made of an alloy or of a metal compound, e.g. stainless steel, which provides an integral bottom-plate structure. The case consists of a stack of plates. The two outermost plates form a back and a bezel, bearing the watch glass, respectively. The remaining plates are formed with openings that together define in the case housings for accommodating components of the watch.

Abstract (fr)

Montre dont la boîte (10), en alliage ou en composé métallique, forme platine. La boîte comporte un empilement de plaques (20 à 31) dont les deux extrêmes (20 et 31) forment respectivement le fond et la lunette portant la glace 33. Les autres plaques (21 à 30) comportent des ouvertures qui définissent des logements dans lesquels se trouvent les composants de la montre.
