Abstract (en)

1. A washing compound suitable for washing crockery in dishwashers, comprising as a percentage by weight relative to composition : - 25 to 60% softening agent selected from polyphosphates, - 30 to 70% alkalising agent selected from sodium salts containing sodium metasilicate, - 0.5 to 4% non ionic surface-active agent, - 0.5 to 5% coated trichloroisocyanuric acid, characterised in that the trichloroisocyanuric acid is coated using a polyethylene wax in a proportion of 0.5 to 10% by weight relative to the weight of the acid, the said wax having a mean molecular weight of approximately 2 500, a low melting point of less than 70 degrees C, a dripping point of 70 to 80 degrees C with a density of 0.86 to 0.88.

Abstract (fr)

Nouvelles compositions de lessive convenant pour le lavage de la vaisselle en machine à laver. Elles contiennent comme agent de désinfection de l'acide trichloroisocyanurique enrobé à l'aide d'une cire de polyéthylène utilisée à raison de 0,5 à 10% en poids par rapport au poids de l'acide. Application au lavage de la vaisselle en machine à laver.
