Abstract (en)
[origin: EP0132755A2] 1. Packaging, especially sack-shaped packaging, made from foil-like material, with at least one fold starting from the opening end of the packaging, and in the case of multi-layered packaging involving all the layers, characterized in that the fold (4) runs at right angles to the filling and emptying opening and the free edges of both parts of the fold formed in the packaging are held closed by means of a connection (3) made on both parts of the fold (5, 6), which is not open during the filling process, but which can be broken for emptying.
