Abstract (en)

The invention provides for cardboard scrap cut from a travelling blank (34) or web to be impaled on a spike (20, 22, 24) carried by one roll (12), with an ejector plate (26) pivoted adjacent to that spike and cam operated so as to positively eject the scrap pieve from the spike at an angular position remote from the impaling position. Figure 1 shows the spike and plate ready to receive the scrap.
