Abstract (en)

[origin: US4601313A] An auxiliary member or accessory serves to reduce or limit the length of a weaving reed for the purpose of adapting it to the desired weaving width, so that the same reed can be used for differing weaving widths. The auxiliary member or accessory can be a stretching device or a detection device for the inserted weft threads. A flange of the auxiliary member is inserted between two reed lamellae or dents and is fixed on the rear side of the reed by means of a locking element.

Abstract (de)

Das Hilfsorgan (12) dient zur Verkürzung eines Riets (1) zwecks Anpassung an die erwünschte Webbreite sodass dasselbe Riet (1) für verschiedene Webbreiten anwendbar ist. Das Hilfsorgan (12) kann eine Streckvorrichtung oder eine Wahrnehmungsvorrichtung für die eingetragenen Schussfäden sein. Es wird mittels eines Flansches (17) zwischen zwei Rietlamellen (2) eingesteckt und an der Hinterseite mittels eines Riegelements (19) festgelegt.
