Abstract (en)
[origin: EP0133177A2] System for constructing continuous vaults comprising a structure and glazing, the prefabricated structure taking up all the stresses in the skylight in the fastenings which pass through simultaneously the stringer, the edge profile, the load-bearing arch and the retention clamp of the tensioning thread-cutting screws fixed in the ends of the cover plate, the latter also being fixed, moreover, by thread-cutting screws in the load-bearing arch, and the arched glazing being framed by inner and outer peripheral sealings, the system also being applied to the lateral tympani of the vault and to the arched parts which open for ventilation or the discharge of fumes. <IMAGE>
