Abstract (en)
1. Umbrella-type clothes drier having a washing line attached to arms (1) of an expanding frame, which washing line is divided into individual four-sided cord polygons (15) having retaining buffers non-positively attached at the corners and fixed in the arms, the arms (1) having an approximately U-shaped cross-section, which, at its open end, has guide grooves into which a profile cover slide, which has openings (10, 18) for the washing line and closes the open profile, is pushed, the openings (10, 18) being made asymmetric with respect to an axis extending at right angles to the longitudinal axis of the particular arm and having a region, the extension of which is less than the greatest extension of the retaining buffer (16), and the retaining buffers (16) bearing from inside against the profile cover slide (17) or a region thereof.
