Abstract (en)

[origin: CA1221661A] An inner wrapping for cigarette packs is to be designed in such a way that, on the one hand, maximum moisture and aroma retention is guaranteed, but on the other hand the constructive design of the inner wrapping is in keeping with processing by machine and is favorable for handling. The present inner wrapping is provided on one side and off-center with an extraction orifice which leads up to one of the ends of the cigarettes and which is covered by a closing flap which in the closed position covers its edge regions. An inner wrapping of this type is particularly suitable for a shoulder box.
