Abstract (en)
[origin: EP0134607A2] The arrangement comprises a post slab and a post profile which bears the marking and is supported in said slab. The post slab (1) has a gap (2) running through in the cross-section from the upper side (11) to the base (12). This gap (2) is matched at least on one side to the cross-sectional shape of the post profile (3). A clamping region (31) of the post profile (3) can, according to the invention, be positively clamped in the gap (2) by mechanical means (4, 5).
