Abstract (en)
[origin: EP0134618A1] The adjustable buckle includes a catch (19) mounted on one boot portion and a latch (20) mounted on the other boot portion. A hooking device (21) included in the latch is coupled to a manually actuatable mechanism (18) for moving the hook (21) relative to the catch (19). A ratchet mechanism used to couple the hooking device (21) to the adjustable mechanism includes manually operable pawls (33) to permit micro-adjustment of the hook (21) relative to the catch (19).
