Abstract (en)  
[origin: EP0134914A2] 1. Apparatus for the shrinking, stretching, drying, finishing, dyeing or the like of moving webs (19), consisting of a heatable drying cylinder (2) and a guide roller (3) which is arranged at a spacing from the drying cylinder and the diameter and the axial inclination of which are variable at least at one side with respect to the drying cylinder (2), and with which a web (19) that is to be treated can be laid around drying cylinder (2) and guide roller (3) in a large number of coils offset from one another in the axial direction, in respect of which the drying cylinder (2) and the guide roller (3) are arranged in a closed cabinet-like housing (1) which has an entry aperture (5) and an exit aperture (6) for the web (19) that is to be treated and the housing has a lower inlet aperture (7) for hot air and an upper outlet aperture (8) for the hot air.
