Abstract (en)

[origin: US4555419A] A method for impregnating textile materials made from organic fibers which comprises impregnating the textile materials with a composition containing a crosslinkable diorganopolysiloxane, an organopolysiloxane containing at least 3 Si-bonded hydrogen atoms per molecule, a crosslinking catalyst, and an organo(poly)siloxane containing 1 or 2 Si-bonded hydrogen atoms and 2 to 8 silicon atoms per molecule, in which the composition is free of a filler having a surface area greater than 50 g/m² in an amount greater than 1 weight percent based on the weight of the organosilicon compounds and thereafter crosslinking the crosslinkable diorganopolysiloxane to form a coating thereon.
