Abstract (en)
[origin: EP0135397A2] An assembly for fitting to existing window frames and comprising a vertically sliding sash window arrangement with two panes, e.g. of frameless synthetic resin sheet, has the first pane pressed against the flanges of the side channel members of the assembly by a continuous resilient strip at each side and the second pane is pressed against the back of the first strip at each side by a second resilient strip. Both strips abut against the side frame member by means of disengageable hook formations.
