Abstract (en)

[origin: EP0135703A2] 1. Supporting frame (1), mounted on a carriage which can be moved on rails of an inclined hoist, for load carriers such as skips, load platforms or the like, the supporting frame having at least two longitudinal members (2, 2'), a forward transverse member (3) and a rearward transverse member (3') and the frame (4) of the load carrier having at least two longitudinal members (5, 5') and a transverse member (6), and corresponding fixing devices for the connection between supporting frame and frame of the load carrier being provided on the supporting frame (1), on the one hand, and on the frame (4) of the load carrier, on the other hand, characterized in that the fixing devices (7, 8) between longitudinal member (2, 2') and transverse member (3') of the supporting frame (1) and longitudinal member (5, 5') and transverse member (not shown) of the frame (4) of the load carrier respectively are push-in connections.
