Abstract (en)  
[origin: EP0136960A2] The ski is composed of two runners (1/2) which are parallel to each other and which, at rest, are located in the same plane, the said runners being joined to each other by means of rods (3/4) articulated to mountings (5/6/7/8) fixed to the said runners (1/2) in order to permit their relative displacement as the skier progresses; the said rods (3/4) comprise elastic means in order to bring, at rest, or to tend to bring, during progress of the skier, the runners (1/2) into the said plane. Applicable to skiing. <IMAGE>
