Abstract (en)
[origin: US4711065A] Starting from an apparatus according to German Offenlegungsschrift No. 3,123,496, an apparatus for wrapping relatively large articles, especially a plurality of individual packs (cigarette cartons), is simplified and improved in terms of its mode of operation, in such a way that the packs (20) formed in different ways always leave the apparatus at the same point (discharge conveyor track 40) and can be supplied to a common pack tower (41). For this purpose, there are two folding turrets (38, 39) for wrapping the pack group (22) with different blanks.
