Abstract (en)

[origin: ES8605864A1] The invention is concerned with a method and a unit for treatment of skins with a view to separating the wool from them. This method consists in combining the following operations: (a) steeping the skins in a waterbath in vertical or sloping stacks (M) (b) carrying out a picking 8 upon the hair side of the skins (c) carrying out a fleshing 10 upon the flesh side of the skins (d) impregnating the flesh side of the skins by means of an aqueous solution of sulphide (11) (e) arranging the skins separately from one another in an atmosphere saturated with moisture at a temperature lying between 20 DEG and 25 DEG for a period of time lying between 2 and 5 hours (12) (f) carrying out a wool-stripping operation (31) for separating the wool from the skins and (g) immediately rinsing the wool so separated (34-37).
