Abstract (en)
[origin: EP0138774A2] 1. Landing mat for high-jumping or pole-vaulting having two or more parts (1, 2) which are substantially the same thickness and the same length, arranged parallel to each other and connected to each other along one of the adjacent side faces (7, 8) characterized in that the connection (9) of the parts (1, 2) along the elongated edge (5, 6) of the side faces (7, 8) is so constructed that the parts (1, 2) can be folded together by rotation about the edge connection (9) in the form of a hinge and that the mat is mounted on a frame (3) which is equipped with rollers or wheels (12).
