Abstract (en)

Capsule of plastic sheet (A) for covering taps/corks and bottle tops (B), prearranged for removing automatically, when washing the bottle, the adhering portion left thereon, wherein, for joining the respective longitudinal edges (1) a degradable joint is provided, such as adhesive material or welding or also an intermediate joining material like a strip constituted of degradable material which loses resistance characteristics thereof (2) in the presence of normal washing treatment for bottles (B), so as to cause automatic removal thereof by means of the mechanical action of said washing.
