Abstract (en)

A rolling mill stand comprises a frame (10), two carriers (14) mounted on the frame (10), for relative lateral movement towards and away from one another, each carrier (14) having removably mounted thereon a roll chock assembly (39) comprising a bearing housing (40) having two spaced apart bearing means (44) and a roll member (45) disposed between and rotatably mounted by said bearing means (44) to provide a roll pass between the roll members, a drive means (25) to rotate each roll member (45), and a detachable coupling (36,37) between the drive means (25) and the roll member (45).
