Abstract (en)
[origin: EP0140010A2] 1. A marine propulsion unit with a main driving engine (1) with direct effect and a marine auxiliary engine (11) installed at the propeller end, for instance a marine generator for the generation of current, which can be driven by the main driving engine, or propeller shaft (2) via a transmission gear (6) supported on its own bedplate (7) with a driver (12) in the form of a hollow wheel, characterized in that the driver (12) of the transmission gear (6) for initiating the driving torque is fitted with a coupling (14) made up to radially mountable elastically absorbent coupling members (15).
