Abstract (en)
[origin: EP0140219A2] 1. A single-pole or multipolar terminal strip having screw terminals which can engage resiliently in compartments of an insulating member, which compartments are open upwards, the terminals engaging under undercuts in the web walls of the insulating member and having clamping members constructed substantially in the form of rails bent into U-shape, with clamping screws, characterised in that the web walls (9) are provided with longitudinal surface-leakage-current slits (10) forming walls which can be bent resiliently in relation to one another.
