Abstract (en)

[origin: EP0140824A2] A wash basin, adjustable in height and arranged in front of the surface of a building wall, having two vertical rails spaced apart from one another in the horizontal direction, rollers (7) running on the rails and connected to the basin (1) via a support (6), and a covering in front of the rails with a vertical slot for the support (6). The invention consists in the fact that the rails are situated behind the surface. In this way, a visually successful solution possessing few dust traps is provided. <IMAGE>
