Abstract (en)

[origin: WO8404369A1] The fabric layer (21) is provided with opposed sides (22, 23) and at least one polymeric part (24, 25, 72 75) secured to the fabric layer. The fabric layer (21) comprises a first substantially planar layer (26) of threads (27) disposed in superimposed relation with a second substantially planar layer (28) of threads (29), whereby the threads (27) of the first layer (26) are not woven with the threads (29) of the second layer (28). The polymeric part (24, 25, 72, 75) is effectively the sole securement that secures the threads (27) of the first layer (26) to the threads (29) of the second layer (28), and thereby imparts its flexible characteristic to the securement between the threads of the first and second layers.
